END TO END MANAGED SERVICE

A comprehensive outsourcing model where all aspects of IT or operations are managed by the service provider.

BENEFITS

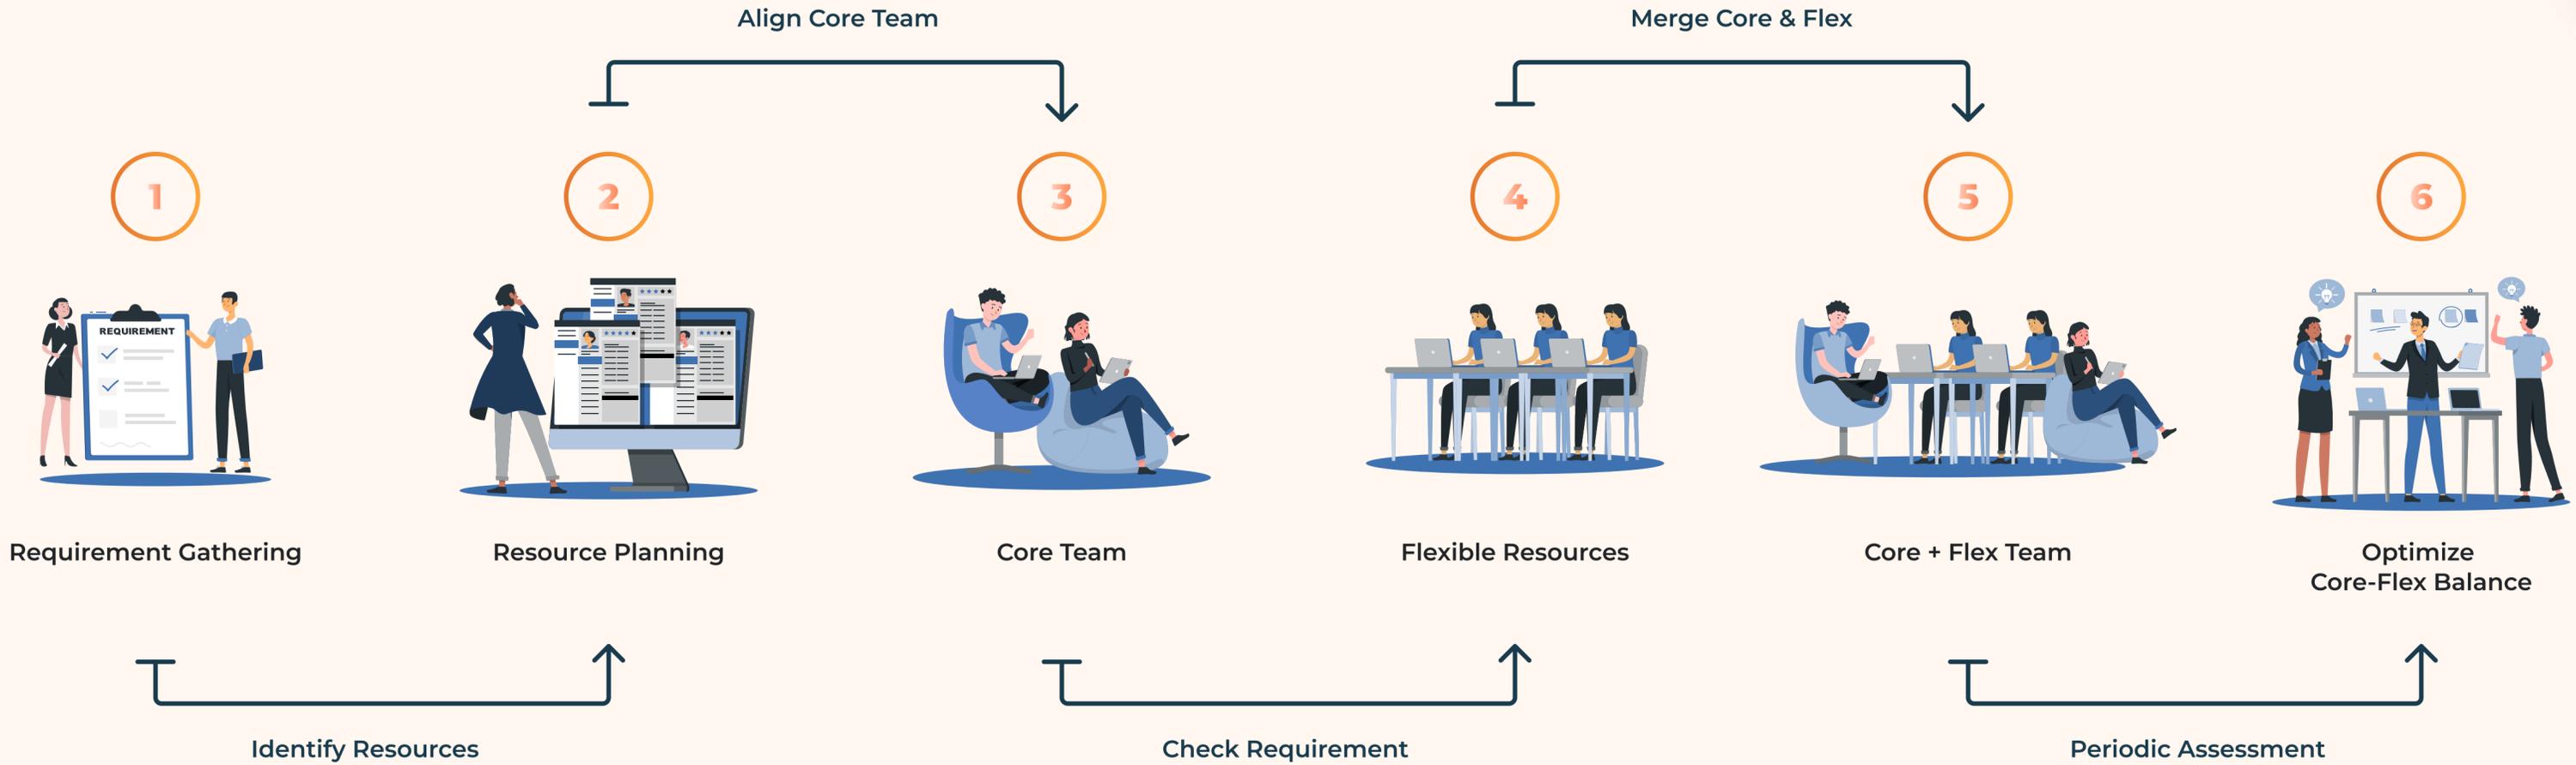

- Comprehensive Oversight & Cost-Saving Efficiency
- Seamless Continuity
- Enhanced SLA Compliance & Single Point of Contact

SCENARIOS

- When you need 24/7 management for mission-critical operations.
- Current team lacks the bandwidth or expertise to handle complex services.
- For cost-effective solutions with guaranteed service quality.

CORE AND FLEX SERVICE

A hybrid workforce model with a dedicated core team for stability and an on-demand flex team for scalability

BENEFITS

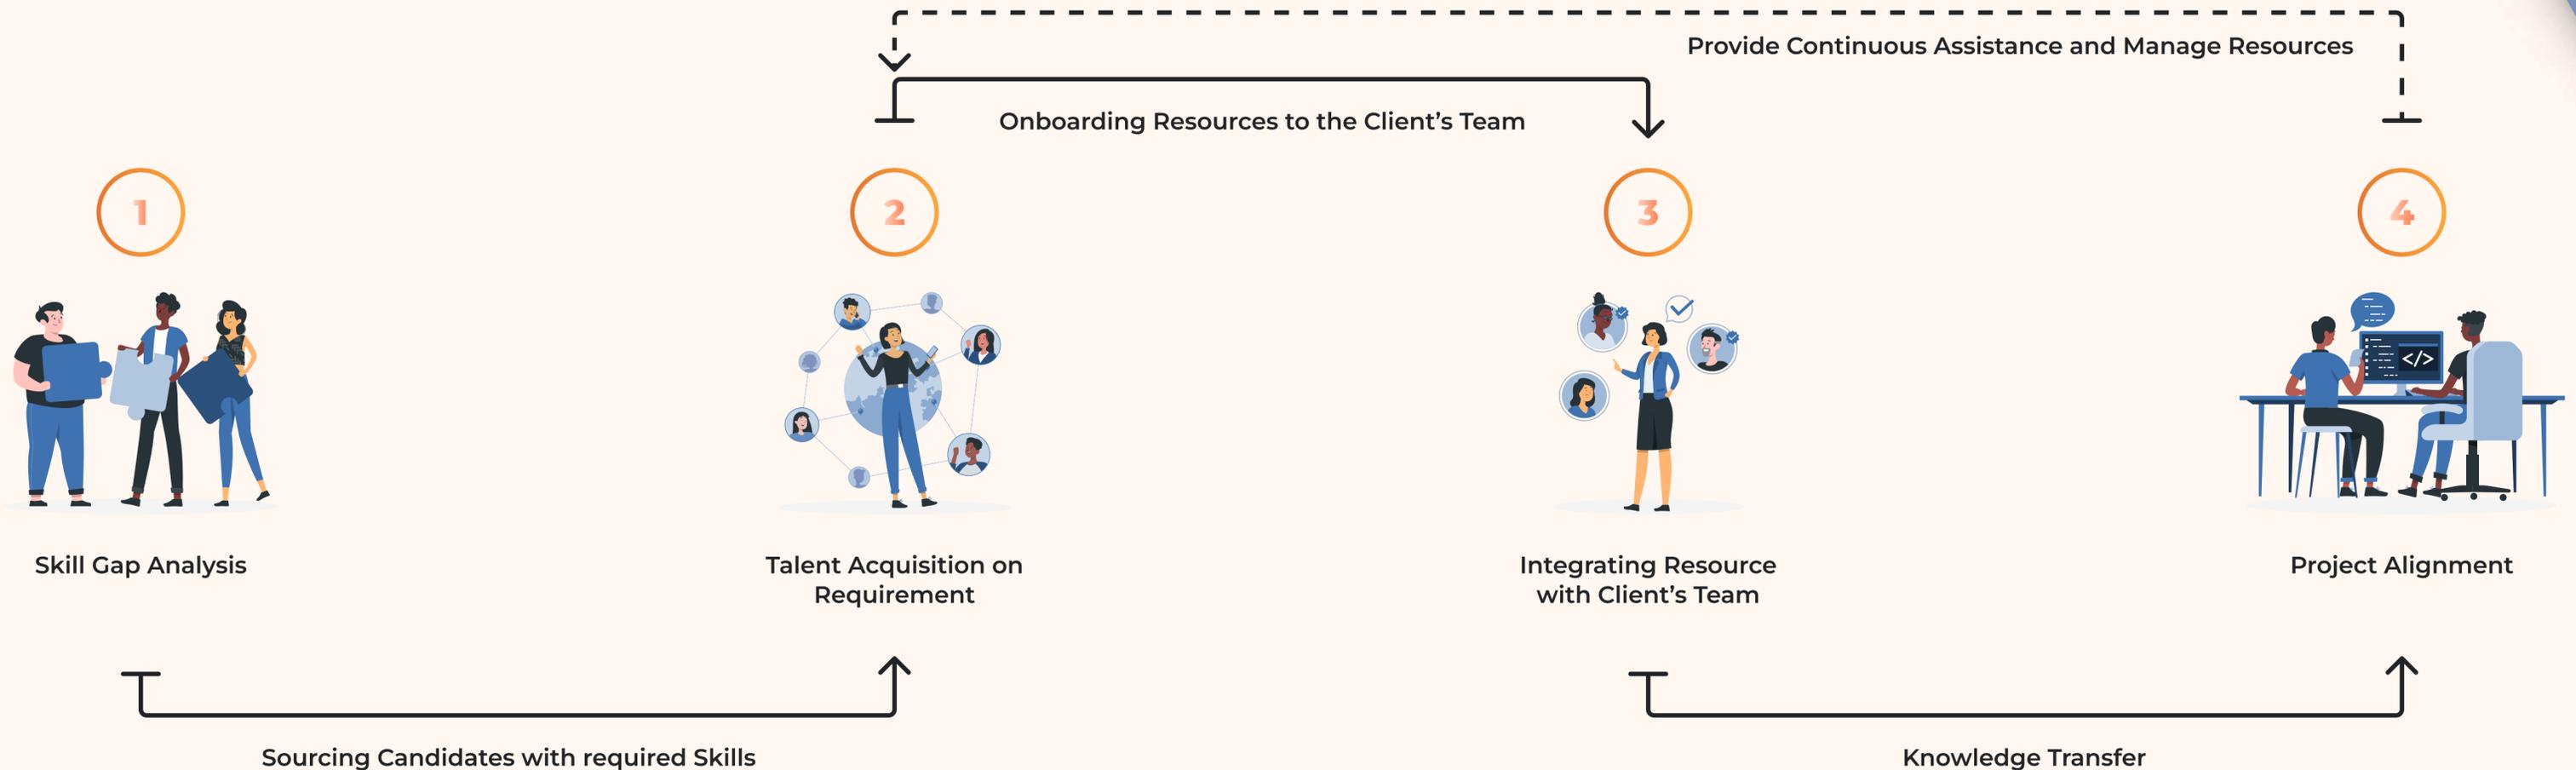

- Budget Certainty & Clear Deliverables
- Risk Mitigation
- Streamlined Procurement

SCENARIOS

- For well defined projects with minimal scope for change
- To maintain strict financial control
- When seeking efficiency without compromising quality.

TIME AND MATERIAL SERVICE

It is a flexible outsourcing strategy to quickly add skilled professionals to your team, bridging talent gaps without long-term commitments.

BENEFITS

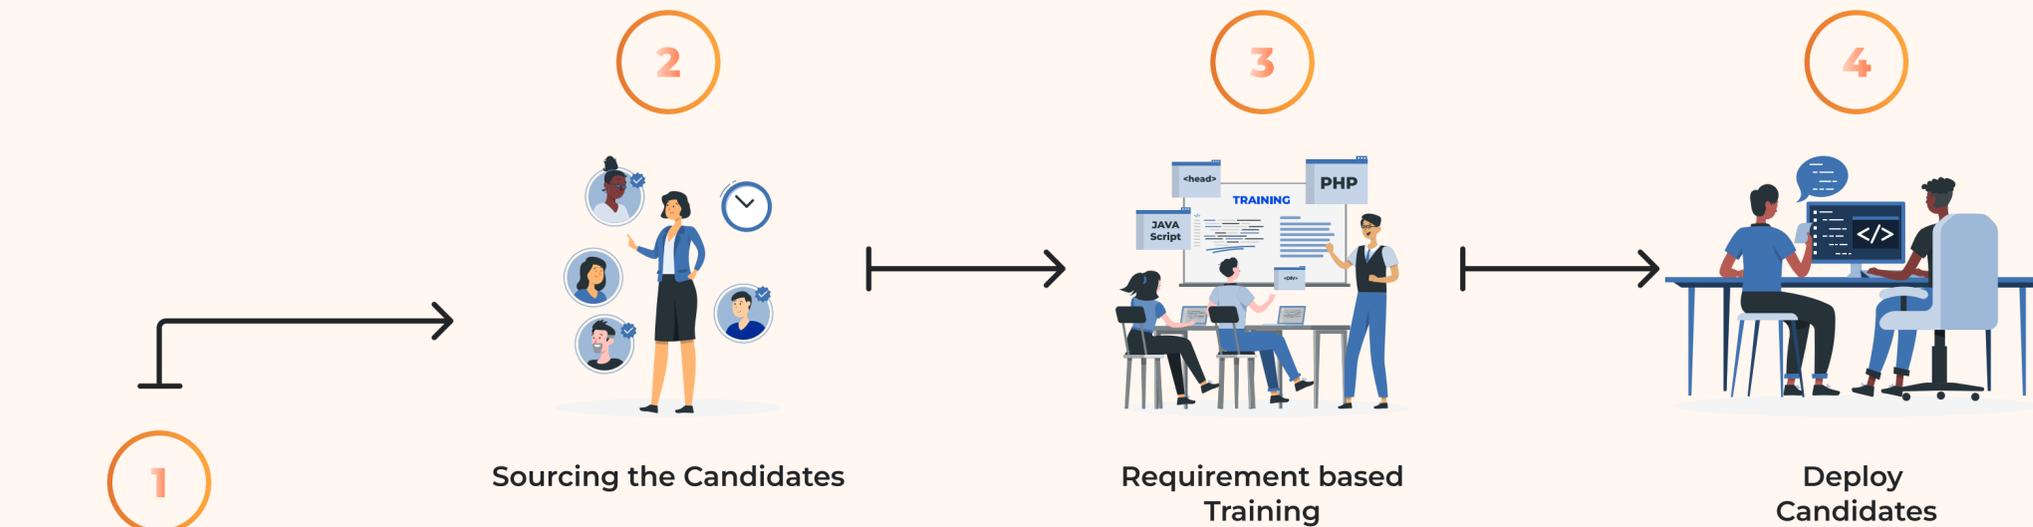

- Access to Specialized Talent
- Scalability & Cost-Effective
- Reduced hiring Overhead & Faster Time-To-Market

SCENARIOS

- When you face short-term skill gaps for critical projects.
- Require niche expertise without long-term hiring commitments.
- Augment in-house teams for peak workloads or tight deadlines.
- If your business needs agility to scale resources for complex projects.

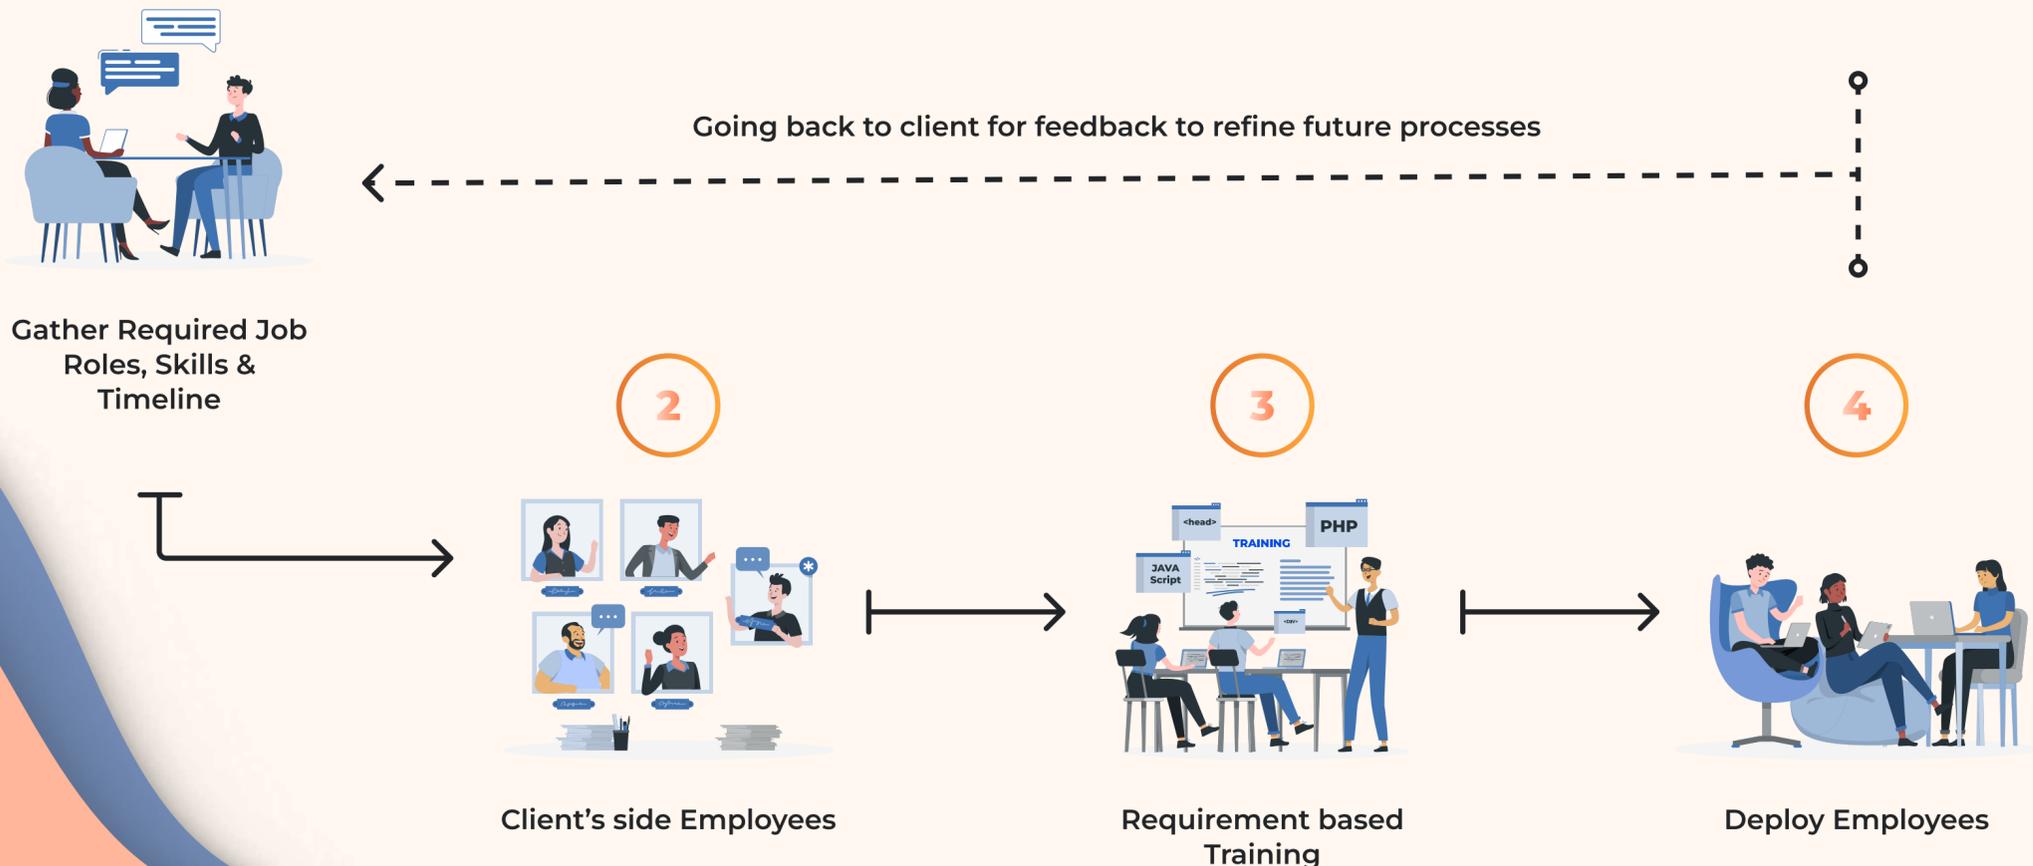

HIRE - TRAIN - DEPLOY SERVICES

A workforce development model where candidates are hired, trained for specific roles, and deployed directly into projects.

BENEFITS

- Customized Workforce
- Faster Deployment at Lower Cost
- Higher Retention

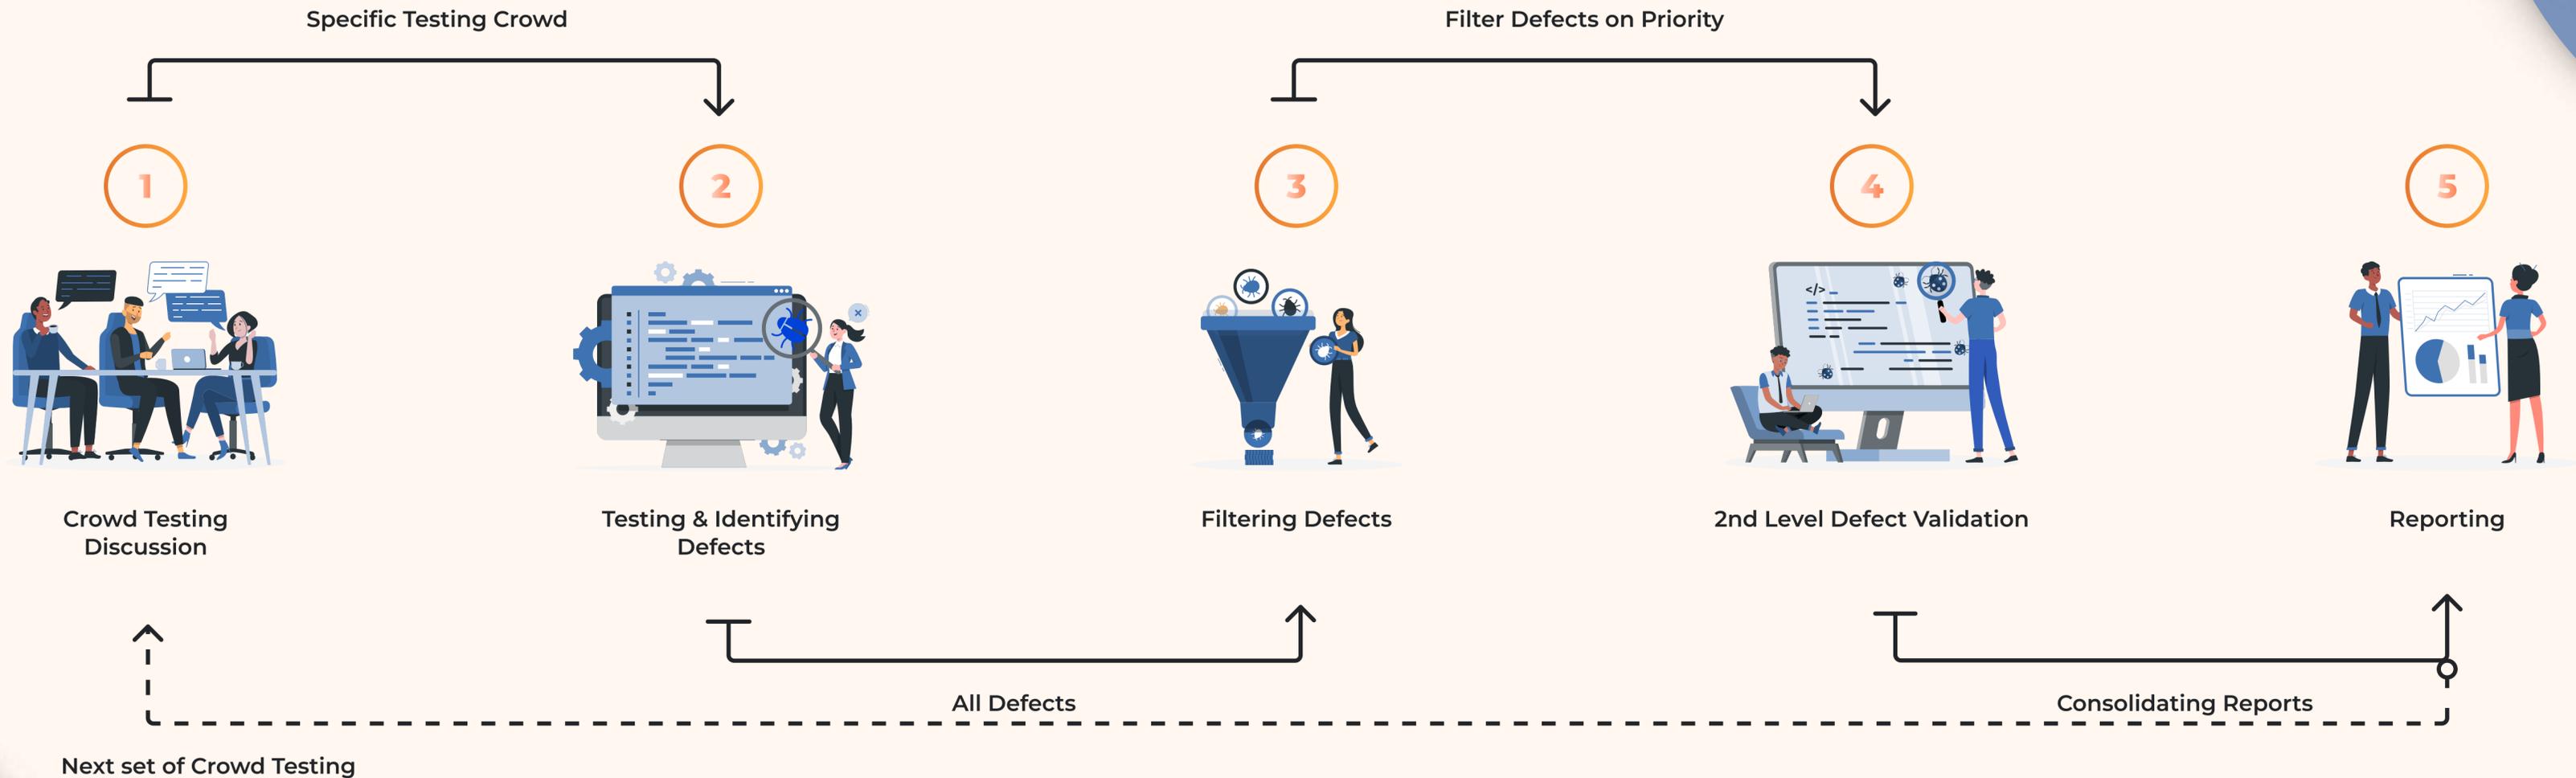

SCENARIOS

- When custom skills are a must for project success.
- To reduce recruitment time and onboard with precision.
- Project-ready, tailored talent without the cost and delay of traditional hiring.
- When your project demands highly trained, project-specific talent.

CROWD TESTING SERVICE

A testing approach that utilizes a diverse group of real-world users to validate software quality across various scenarios.

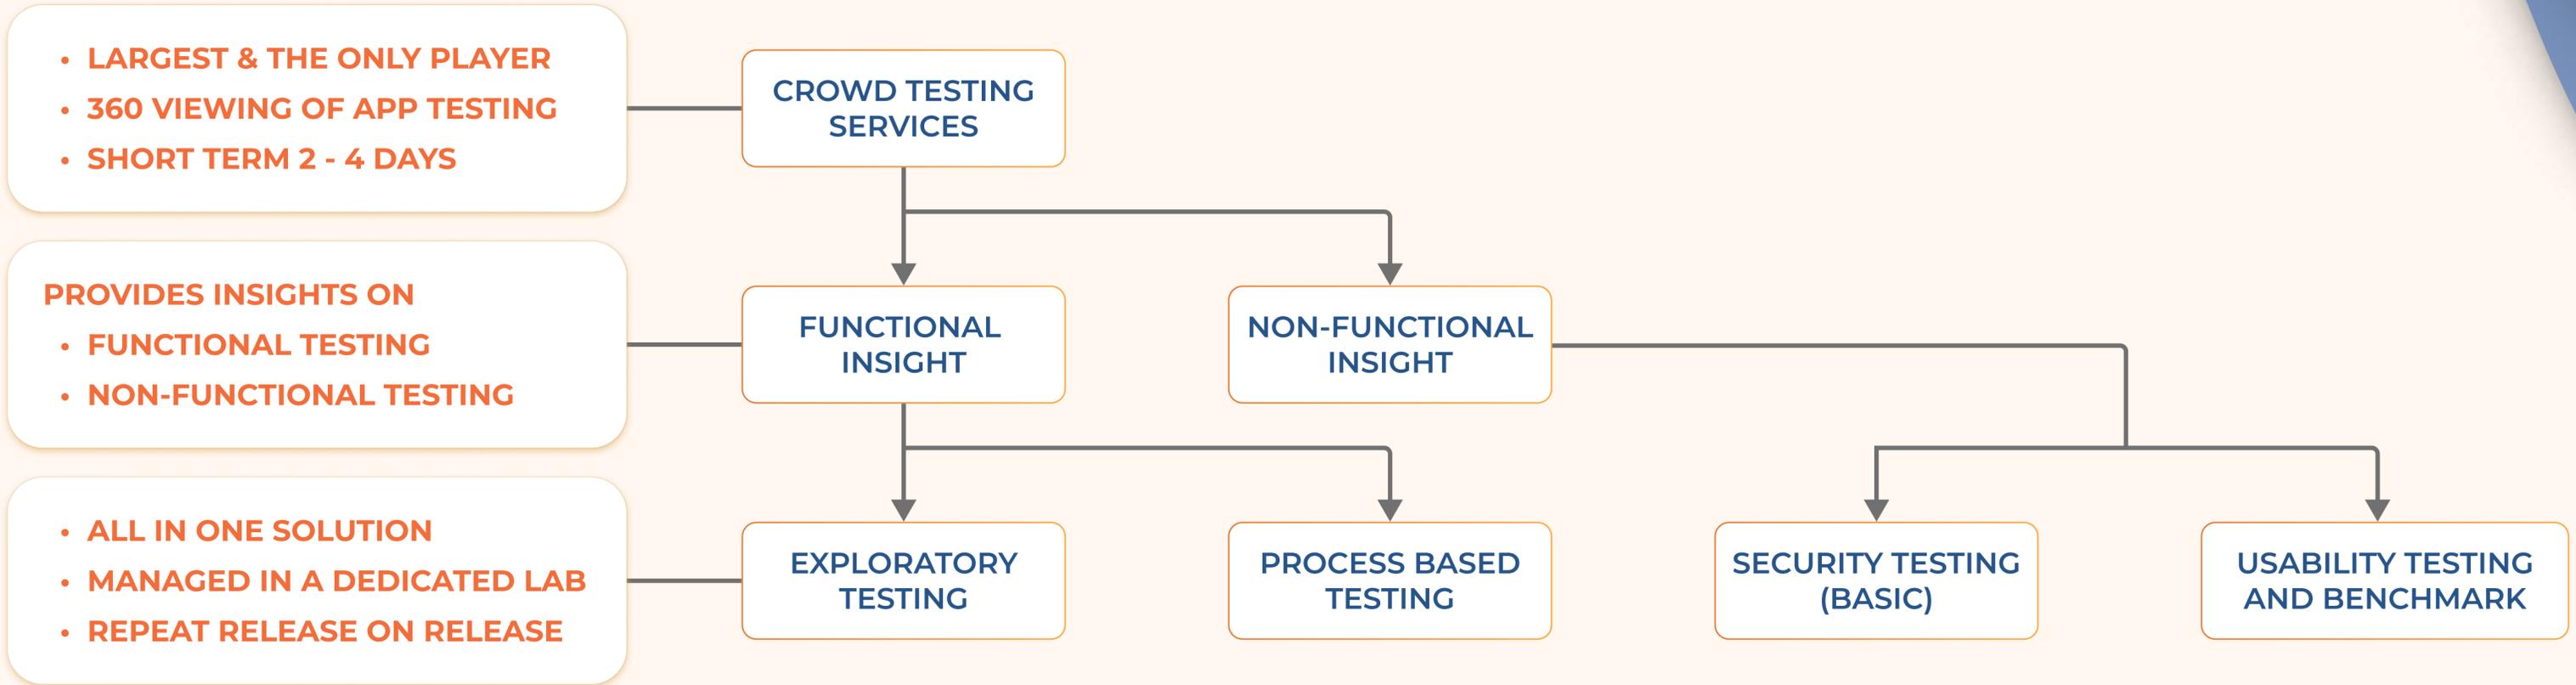

BENEFITS

- Real Life Insights
- Faster Results
- Cost Saving Global Research

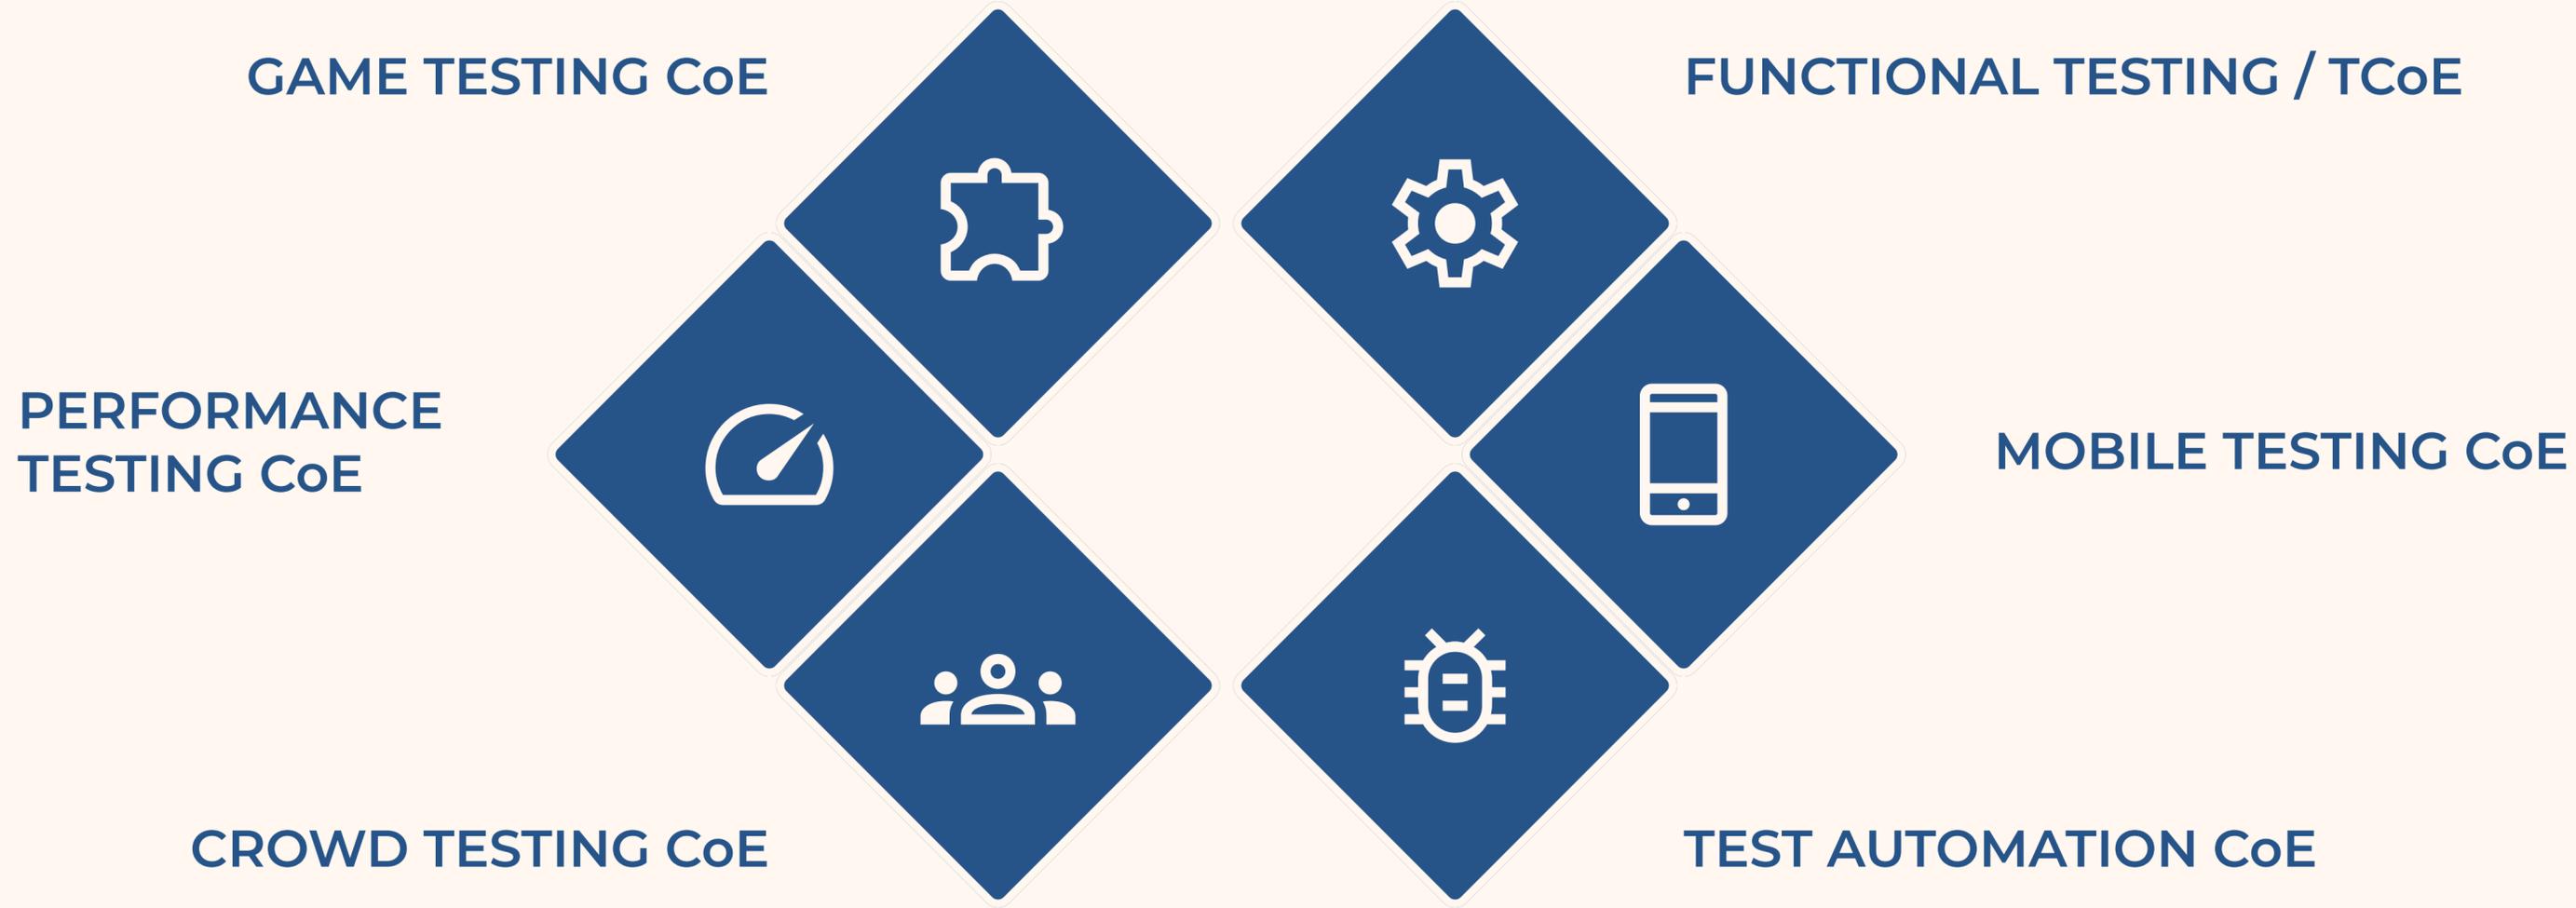

SCENARIOS

- When real-world validation is key for success.
- For fast and diverse feedback across devices and regions.
- To supercharge quality assurance without bloating your in-house team.
